

Math 378 Lesson Plan Review Sheet

Please use the following check list to review the lesson plan from another group. I will use a similar rubric for the final evaluation. Turn in your feedback forms

Structure:

The lesson plan has all of the following components and they have submitted both the Rmd and pdf files. If an item is included but of low quality, then note this with a check minus, if they have gone above and beyond note it with a check plus:

- 1) Title and authors
- 2) Introduction
- 3) Objectives
- 4) Examples to illustrate the main ideas
- 5) There must either be a reading(s) or video(s) for the students to review prior to or during the lesson
- 6) At least three homework questions
- 7) References

Professionalism:

The quality of the writing is at an appropriate professional level. Please provide feedback and describe it here.

Quality of the Lesson:

Evaluate how much you learned in the lesson giving full credit for an appropriate amount of material for a single one hour lesson.

When I grade, the structure will be worth 40 points, professionalism 10 points, and quality of the lesson 20 points. The remaining 30 points will be the review sheets and the quality of your feedback.
